

ISG Family of Products

Do more for
your members

Automate and simplify
work for association staff

Get more out of your
investment in *iMIS*

ISGsites Create online workspaces for groups like committees, chapters and SIGs so they can work together more effectively. ISGsites is built on top of SharePoint 2010, so you can use the powerful document management, reporting and collaboration capabilities in SharePoint. Permissions are based on member status in *iMIS*, so it's easy to make sure people have access to the files they need, and nothing else.

ISGframework Gain tight integration between SharePoint 2010 and *iMIS*. With ISGframework, you can use information about your members and events that is stored in *iMIS* to manage SharePoint.

ISGweb

Make your website a more engaging destination for your members - without custom programming. You can have an advanced ecommerce website, with intelligent online meeting registration, membership application, directories, buyers guide, product catalog, and much more. With ISGweb, your website automatically draws member and event information from *iMIS*, and follows your association's unique business rules.

iBridge

Free your web developers from the restrictions *iMIS* puts on the look and feel of your website. With iBridge you can get your site to work the way you want it to without requiring that your web developers learn the intricacies of the *iMIS* database and iBOs.

All of the ISG products are packaged software, with a defined upgrade path and the technical support you need.
